*“The warmth and beauty
real wood bestows upon your
home cannot be overstated...”*

*get back to
real wood*

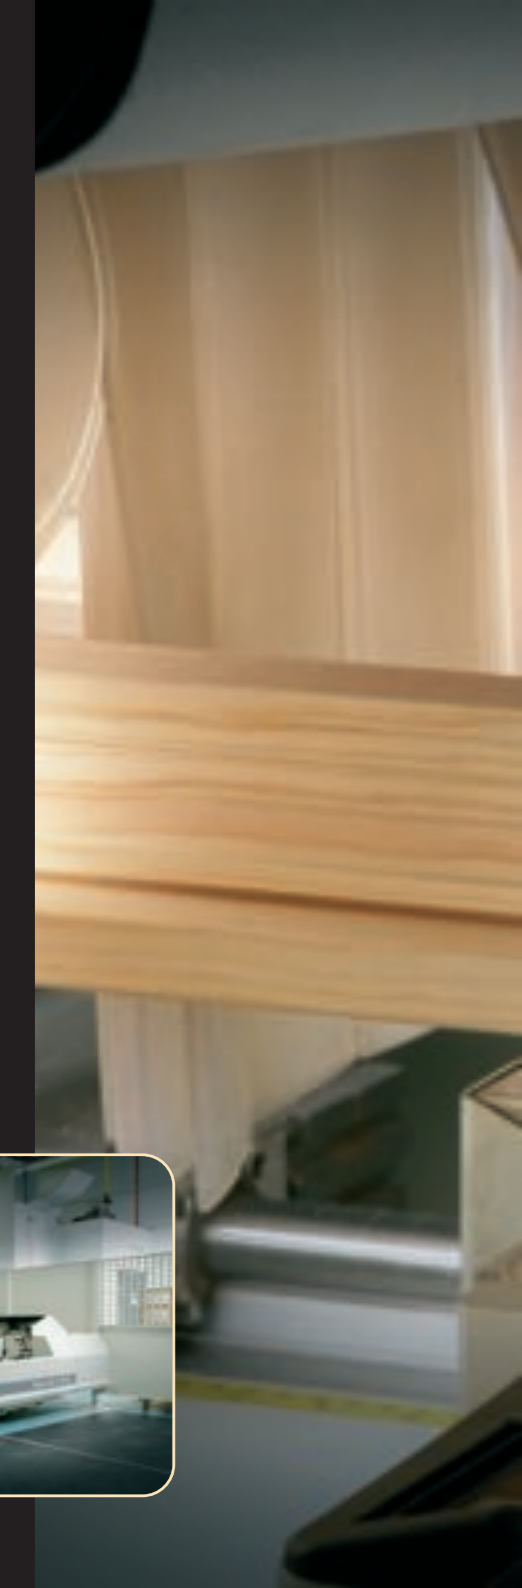

The Wooden Window Company is focussed on producing top of the range windows and doors of the highest quality at competitive prices.

The company is led by professionals with many years experience in design, manufacturing and installation in the construction business. Our principal Director has ensured that our joinery works in Basingstoke has the most up to date state of the art machinery available in Europe today.

The multi-axis timber milling machine works to within 0.2 of a millimetre in accuracy, but as with all technology, in this day and age the operation is only as good as the person handling it. With this in mind our highly trained and skilled work force are dedicated to ensuring only top quality products leave the shop floor.

*We constantly aim
and succeed at
being the best.*

All the timber used for manufacturing has been carefully selected by our principal Director in consultation with our Production Manager.

Only the best of engineered European Oak, Sapele and Redwood are chosen. We can also source wood such as Walnut and Teak for those special jobs that now and again come along.

The look and feel of real Wood, nothing compares.

Engineered wood is a natural wood that has been strengthened and stabilised by removing knots and weakened parts of the tree. Appearing exactly like its natural counterpart it is also machined and jointed in the same way. Engineered Wood affords a stronger and more stable material, which is less prone to warping and twisting, from which to construct windows and doors.

All of our windows and doors are finished in a range of attractive high quality microporous coatings. This ensures that your investment will last for many years with only minimal maintenance.

Security is taken care of by multi-locking insurance company approved locks and latches. Our heavy duty handles, hinges fixtures and fittings come in a number of different finishes to suit the character of your home. Hard wearing and burglar resistant.

Today in our changing climate with rising fuel prices insulation is uppermost in most people's minds. With our unique *TwinDraft* design you will keep out the cold and reduce noise pollution. Thermally efficient glass is standard, however we can offer a range of more efficient insulation and sound-minimising solutions.

☎ 0870 777 2663

Finished in style to keep you secure, warm, dry & quiet.

Stage one of any structural improvement is to have a surveyor call so you can find out how much it will cost.

Your supplier will arrange this for you. When he calls he will discuss your requirements and needs and give you a quotation. If you are happy with your supplier, the quality and cost he will arrange a second visit, this time from a manufacturing surveyor. He will then confirm all aspects of your order and take accurate and appropriate measurements for our factory to manufacture to.

Installations are carried out by your supplier's fitting team. The fitting team will arrange a date to suit you and install the new windows with minimum fuss and disturbance. The Wooden Window Company ensure that all suppliers of our products have sufficient training and experience to install our products properly.

Just pure quality, from beginning to end.
